- ICMP Connectivity Test: PING ADMIN 11 TO PC 11 A (Target IP: 192.168.0.5)

- ICMP Connectivity Test: PING ADMIN 22 TO PC 22 A (Target IP: 192.168.0.133)

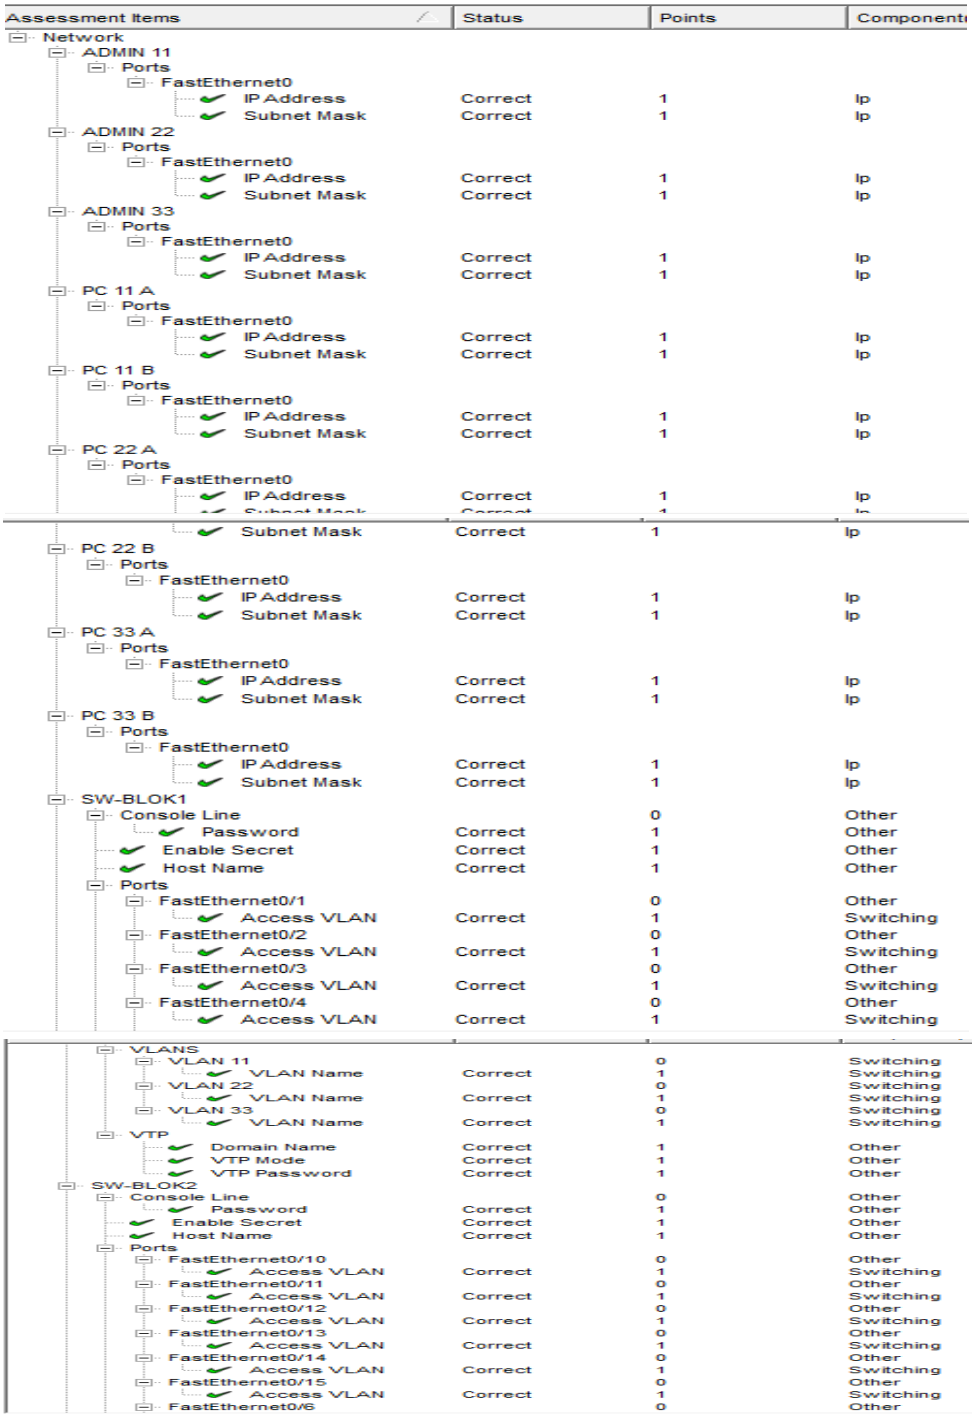

- ICMP Connectivity Test: PING ADMIN 33 TO PC 33 A (Target IP: 192.168.0.197)

- Cisco Packet Tracer Practical Examination Grade Evaluation Matrix

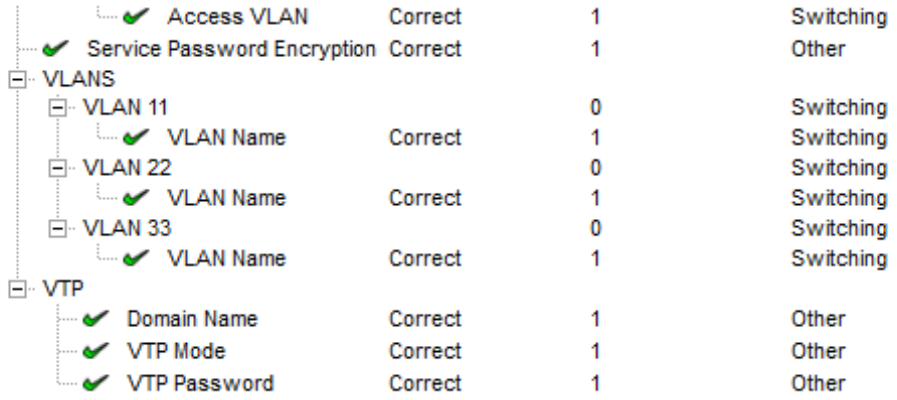

Score	: 66/66
Item Count	: 66/66

Component	Items/Total	Score
Ip	18/18	18/18
Other	21/21	21/21
Switching	27/27	27/27

Assessment Items	Status	Points	Component
Network			
ADMIN 11			
Ports			
FastEthernet0			
IP Address	Correct	1	Ip
Subnet Mask	Correct	1	Ip
ADMIN 22

FastEthernet0/6		0	Other	

The detailed verification hierarchy log above documents the successful execution parameters for individual network nodes. The system verifies that the Layer 3 IP configuration modules on every endpoint terminal—including the administrative cores (ADMIN 11, 22, 33) and access layer nodes (PC 11, 22, 33 A/B)—possess completely accurate IP addresses and corresponding subnet masks. Furthermore, it logs that access layer interface mappings (Ports FastEthernet 0/1 through 0/4 on SW-BLOK1) are correctly configured within their respective target VLAN architectures, validating the structural enforcement of all initial engineering assessment guidelines.
